

CELEBRATE THE OPENING OF T5 WITH A NEW TAXI

As Terminal 5 at Heathrow was just days away from completion and its first flights, London's taxi trade press was invited to take a tour of the new building. Mann and Overton London had just launched a Special Edition T5 cab to encourage drivers to invest in their vehicles to help ensure that Terminal 5 remains securely in the hands of the taxi trade as far as onward travel is concerned. The new rank and feeder at the Terminal have been secured thanks to the tireless efforts of trade representatives such as Colin Evans and the team from HALT. In today's market place technology is at the forefront of many businesses and the supply of onward travel and of course travel to the fliers is becoming increasingly more diverse so the taxi trade needs to ensure they offer

a service which is second to none in order to keep the rank at the new terminal.

Once inside the new terminal, the size of the building is evident – in fact it is almost like an airport within an airport. New signage has been put up to direct arriving passengers. This includes taxis, buses, Underground and Dot2Dot, the newly launched service from National Express which services London hotels as well as Canary Wharf. The rank is situated very conveniently for passengers just outside the main arrivals hall. On the day of our visit, the area was not quite ready for its first passengers but the signage was already in place. The idea behind the initiative launched by HALT and Unite (T&G) is that drivers will take advantage of the offer of the newly branded T5 taxi on offer from M&O London. The deal will see drivers who are members receive a voucher worth a massive £1,800 in discount off the retail price of their TX4 T5 cab. The voucher will also entitle them to 12-months free insurance and a free first 10,000 mile service. The T5 special edition cab from M&O is based on a Bronze specification TX4 with factory fitted front and rear air conditioning complete with T5 branding.
