

COMCAB SCORE A FIRST WITH THE VITO TAXI

Computer Cab plc is the first taxi circuit to be able to offer their account customers the exciting new Mercedes Vito thanks to KPM (UK) Taxis. Long serving ComCab driver John Williams was one of the first drivers in London to place his order for the new Vito taxi – putting his name down even before the official launch. Whilst he was awaiting delivery for his new taxi he got an unexpectedly quick offer for his immaculate TX4 Titanium taxi and suddenly found himself without a cab- or a radio!

John promptly contacted Steve McCarthy at KPM sales to see if any loan taxis were available and Steve went one better, providing John with the

first Mercedes Vito taxi to actually ply for hire on London's streets. John commented: "I was delighted when Steve told me they actually had one of the new Vitos I could use until mine was ready. I was looking forward to getting behind the wheel since I placed my order and this cab is the same spec as the one I am getting delivered so it's been a great test drive. Customers love it and you can imagine how many comments I am getting."

But there was one small problem, as a loyal ComCab driver John was anxious to make sure he could get back to providing top end corporate customers with a first class taxi service. After a quick phone call to the

ComCab Radio Services Team Steve McCarthy had agreed to let John have the ComCab system fitted to the loan Vito.

John added: "I am really grateful to Steve at KPM and to ComCab for making this happen so quickly. Not only was I lucky enough to be the first driver to hit the streets in this cab but I am also the first on radio. It's great to be able to give ComCab customers an early glimpse of this cracking new cab."

Malcolm Paice, Head of Operations commented: "John is one of our busiest radio drivers, covering our top account clientele and I am very happy that he has been able to keep working thanks to close co-operation between KPM and our Radio Services Department. It is only appropriate that the first of these new vehicles has London's leading radio circuit equipment fitted, it reminds our customers that they are receiving a world class service whenever they call us for a taxi."
